

# Data Visualization Platform for Auditors (Mobile)

PROJECT NAME

GoAudits

INDUSTRIES

Technology

YEAR

2023

DELIVERABLES

Consulting, Design, Development

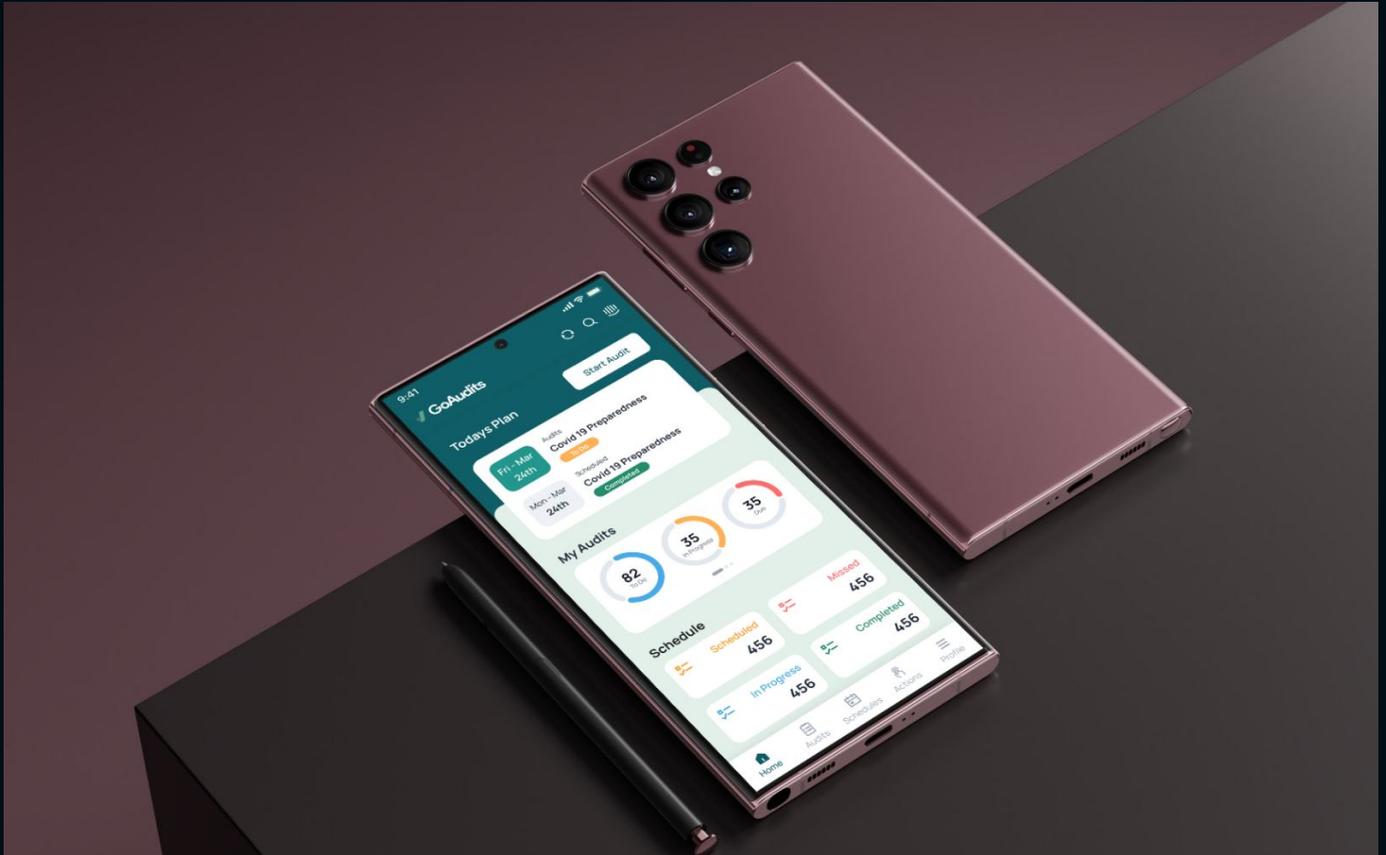

## The client

GoAudits is a user-friendly auditing application designed for streamlined audits and inspections anytime, anywhere, eliminating the need for paperwork or manual report typing in the office.

## Challenges

The challenge was to create dashboards that seamlessly aligned with Key Performance Indicators (KPIs) derived from front-end audits. Ensuring a meaningful representation of data and insights was crucial for the project's success.

# How we made it Happen

We achieved this by meticulously crafting dashboards that perfectly aligned with Key Performance Indicators (KPIs) derived from front-end audits. Our focus was on ensuring that data and insights were meaningfully represented, which was essential for the project's success.

## Impact

50%

reduction in audit time

40%

improvement in issue resolution speed

99%

accuracy in compliance reporting
